

House Cleaning Planner

Alexa Skill

How it started?

H O W I T S T A R T E D ?

An increasing trend in percentage share of elderly persons to the total population of India is observed since 1961. In 1961, 5.6% of the population was in the age bracket of 60 years or more, the proportion has increased to 10.1% in 2021 and further likely to increase to 13.1% in 2031. An increasing trend is observed in old age dependency ratio also that has increased from 10.9% in 1961 to 14.2% in 2011 and further projected to increase to 15.7% and 20.1% in 2021 and 2031 respectively.

A growing number of children in urban population are moving out of their base towns within and outside country for higher education, career and better lifestyle and thus settling away from their parents.

What they need is an ecosystem which :

- ✓ makes their life more enjoyable, comfortable and satisfying.
- ✓ takes care of their medical and non-medical needs
- ✓ supports them in travel and see the world
- ✓ keeps them engaged and entertained
- ✓ easily connect them to labs for diagnostics and hospitals for treatments
- ✓ takes care of their property and financial management
- ✓ take cares of their legal issues and settlements
- ✓ provided them with one point shopping solutions

Features

Keep your home in good shape cost effectively with the Home Maintenance Planner Alexa skill. This app enables elders and aging citizens to receive email Email Reminders and Notifications for House Cleaning Planner, Home Maintenance and Spring cleaning.

Alexa skill id: amzn1.ask.skill.4858709d-3303-458d-a3cf-fae58185466d
